

# CHOICE THEORY & REALITY THERAPY

Basic Intensive Week  
(8 - 10 Sep 2021)  
9am - 5pm

This 3-days intensive course will introduce learners to the ideas of Choice Theory, which was formulated by psychiatrist Dr William Glasser. Choice Theory posits that all humans have 5 basic needs (survival, freedom, fun, power, and love/belonging) that we attempt to satisfy through our behavioural choices. According to choice theory, almost all behaviour is chosen, and we can only control our own behaviour. Reality Therapy is the method of counselling that is firmly based on Choice Theory. Successful application of reality therapy is dependent on a strong understanding of Choice Theory. Learn to apply Reality Therapy, Choice Theory and Lead-Management to professional and personal life.

## Mode of Delivery

Face to Face.

Participants will be involved in the demonstration, self-evaluation, role-plays and feedback.
